

HDTV-UHF Digital Indoor Antenna ZHDTV1Z

► Highly Directional

High front-to-back ratio helps reject unwanted multi-path signal corruption. This ensures densely populated urban areas receive clear HDTV and data broadcasting signals.

► Even Response

A flat forward gain slope delivers balanced reception throughout UHF. Ensures all channels are received to the same quality.

► Proven in the Field

Silver Sensor proven itself in front of the FCC, but it is now the "reference antenna" for data broadcasting.

► Easy to Install

► 75 Ohm, Gold Plated "F" Connector for Antenna InPuts

UPC Code: 044642011024

Dimensions: 9.5"H x 13"W x 13.5"D

Weight: 1.6 lbs.

Note: When using the enclosed antenna, you will only receive UHF channels. To receive VHF channels (Channels numbered 1 thru 13), you must also connect a VHF antenna to the TV. You can install a device referred to as a "antenna combiner" which will combine the two antenna output signals into one 75 ohms for a single connection.

Safety Note: Cables or cords connecting your television to any antenna, set top box, electrical outlet or any other component should never be craped or hung across traffic areas or in any positions where those cords or cables may be pulled on or tripped over, causing damage or injury to equipment or people.
